**MY ICE ART**

## **DIRECTIONS –**

Go outside and look for interesting nature treasures. Arrange your treasures on the bottom of your plastic plate. Add your string. (Drape it so the ends get frozen in the water and the loop of your string hangs off the plate.) Pour water over everything and leave this outside overnight or pop it into the freezer if it's not cold enough (that's what I actually found easiest.) Once the disk is frozen, hang your ice art in a spot where you can enjoy it sparkling in the sun.
